DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/13/07 has been entered.

Examination on the same follows.

Claims 11-12, 14-16 and 19 are pending.

The Double Patenting Rejection of claims 11,12, 14-16 over US 6,455, 549 has been withdrawn as applicants have filed a terminal disclaimer.

The Double Patenting rejection of the claims 11,12, 14-16 over US 6,838,470 has been withdrawn as applicants have argued convincingly that the '470 has a proviso through out the specifications and the claims that wherein E1 is an O the E2 cannot be an O also.

New Double Patenting Rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11,12,14-16 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6706734. Although the conflicting claims are not identical, they are not patentably distinct from each other because

They read on compounds of the same generic scope.

Also see the certificate of correction which teaches the compounds which would fall within the scope of this application.

and insert the following chemical structure for Compound 46

As applicants compounds are drawn to

wherein E is an O, Y and Z are H, X is an OH, B is an alkylene group substituted by OH, A is a bond and R' is an unsubstituted phenoxy group.

Conclusion

Claims 11-12, 14-16 and 19 stand rejected.
